

# PureEnergy 5.0

The new KBL Tower pureEnergy 5.0 combines unprecedented , exclusive features.

Perfect tanning by maximum power for each user and simultaneous reduction of energy consumption and heat generation for the operator.

Performance high – energy costs down . Currently the most intelligent control for a vertical solarium – the new KBL7 control makes this possible.

The ergonomic layout of the handles in the interior of the tower ensures a comfortable tanning position and a uniform all-round tan!

And for those fitness fanatics, the vibraNano offers short but effective training of the body.

Unique design highlights such as the transparent acrylic ceiling that illuminates the interior of the tower during the tanning session with graphic ornaments, or the eye-catching front create an unprecedented atmosphere and attract everyone's attention . Both design elements in the new color scheme color motion available and make every studio real eye-catcher.
